

MAINTENANCE OF HARDWOOD FLOORS

Prevention

Place bristle-rug type doormats both inside and outside the house to retain gravel and sand, and felt pads under the furniture to avoid scratches.

Regularly remove all dust with a vacuum cleaner (with a special brush suitable for parquet floors) or dust mop.

Maintenance for lacquered parquet :

- Clean the parquet with a cloth soaked in water combined with **special detergent** for lacquered parquets. Thoroughly wring the cloth out.
- To restore gloss to your parquet, use **special polish for lacquered parquet floors**. For matt lacquered parquets, use **matt polish** (avoid using polishing or metallising products).
- Every five to ten polish applications, a **special stripping agent** can be used to eliminate old layers of polish.

Maintenance for oiled parquet

Oiled parquet requires more maintenance.

- After the fitting, a thin film **of maintenance oil** can be applied.
- For routine cleaning **100% natural soap** should be used.
- Further applications **of maintenance oil** can be applied to renew the protective layer.

Contact Kite for further advice on suitable cleaning products.

To remove specific stains, please proceed as follows:

- Fruit, fruit juice, beverages, coffee, tea, milk, blood, urine: with a cloth or sponge, rinsed in water and thoroughly wrung out.
- Chocolate, wax, greases, oils: with a thoroughly wrung out cloth and a small amount of **special detergent**.
- Printing and pen ink, shoe polish, lipstick, tar: use methanol (white spirit) or methylated spirit.

Important: Never clean the grooves of our parquets with bevelled edges with a pointed object!

NEVER USE EXCESS WATER WHEN CLEANING YOUR PARQUET FLOOR. THOROUGHLY WRING OUT CLOTHS AND SPONGES SEVERAL TIMES.
